As a Uni Bridges student, by the time you successfully complete your VCE you will know what to expect when you start university and you will be well on your way to having a place at La Trobe should you choose to take it up.

THE UNI BRIDGES PATHWAY

The Uni Bridges pathway provides a special entry program to La Trobe University, exclusively for Uni Bridges students. You can apply for a place in a range of courses, or in fact any course, directly through the Uni Bridges Pathway. This pathway includes customised subject selection and school recommendations, rather than your ATAR. The courses available through the Uni Bridges pathway vary from year to year, but include a range of courses from the following study areas:

- Agriculture
- Engineering
- Health Sciences
- Information Technology
- Mathematics

Uni Bridges students wanting to apply to La Trobe through the Uni Bridges Pathway can complete an application form and the application form will then be submitted with the Uni Bridges Coordinator at their school. Students must also apply through VTAC following the usual processes.

WHY STUDY AT UNIVERSITY?

- Gain more about yourself and what you believe to be your strengths.
- Gain a degree giving you many new skills and in-depth knowledge you can apply.
- Gain higher qualifications that improve your career prospects.
- You may complete some of your studies centred around your future career path.
- Bring a fantastic social experience, many of the people you meet become friends for life.
- Uni Bridges graduates have gone on to study in nursing, science, animal science, medicine, otolaryngology, physiology and more.

ENGINEERING AND MATHS

Students who pursue further study in science, technology, engineering or health sciences are interested in a science, engineering or health sciences wish to link some of your subjects with a detailed study, engage in project-based approach to your learning, and enjoy a project-based approach to your learning.

WHAT IS UNI BRIDGES?

Uni Bridges is a partnership project between La Trobe University and secondary schools in Northern Metropolitan Melbourne and Bendigo.

HOW IT WORKS

UNI BRIDGES does not make your Year 11 and VCE studies for you. However, it will help you explore and discover your interests. We will support you on your journey and you will have the help of your teachers, La Trobe University academics and postgraduate students. You will also have access to the world-class facilities of La Trobe and you experience hands on, real world science from the very beginning.

You'll experience hands on science and will be provided with a fresh, engaging and exciting learning environment.

You'll have the opportunity to attend excursions to Quantum Victoria, where we participated in practical science investigations.

Science, Technology, Maths and English and at Quantum Victoria.

You will also have the option of using your ATAR to apply for University courses.

The Uni Bridges program can help you make important decisions about your future by making you aware of the science, technology, engineering and mathematics. The enriched curriculum, integrated with the mainstream curriculum at each year level. You'll find that what you are learning at school is linked to the outreach activities you experience when you visit La Trobe University or Quantum Victoria.

Year 12

Your Uni Bridges journey continues in Year 12 and you'll begin to discover your strengths and interests while building your skills. You'll be provided with the support and guidance to discover your journey and experienced in a digital portfolio and you may also be exploring your future study options and career paths.

You'll have a comprehensive assessment of your Year 12 Uni Bridges experience to guide you in selecting your VCE subjects.
