

PURSUE A REWARDING CAREER IN ELECTRICAL

Love technical stuff?
Passionate about learning?
Interested in pursuing a career in the electrical field?

Metroid Electrical Engineering is one of Central Victoria's most rewarding workplaces for electrical apprentices and trainees.

Training opportunities:

OPTION 1: Electrical Apprenticeship

Qualification gained: Cert III Electrotechnology, enabling you to become an electrician. 10 weeks at TAFE per year (paid time), 4 year apprenticeship.

OPTION 2: Electrical Technician Traineeship

Qualification gained: Cert IV Industrial Automation & Control.

Delivered via online training in under 2 years, this enables you to advance faster than an electrical apprenticeship, and pursue a career in a rewarding engineering field without going to Uni.

Many of the modules of this course are identical to an electrical apprenticeship, with additional modules providing electrical engineering and automation expertise. This enables you to pursue roles such as:

- Assembly & wiring of switchboards (same as apprenticeship above)
- Electrical Design & Drafting
- PLC & HMI programming
- Functional Testing
- Onsite Commissioning

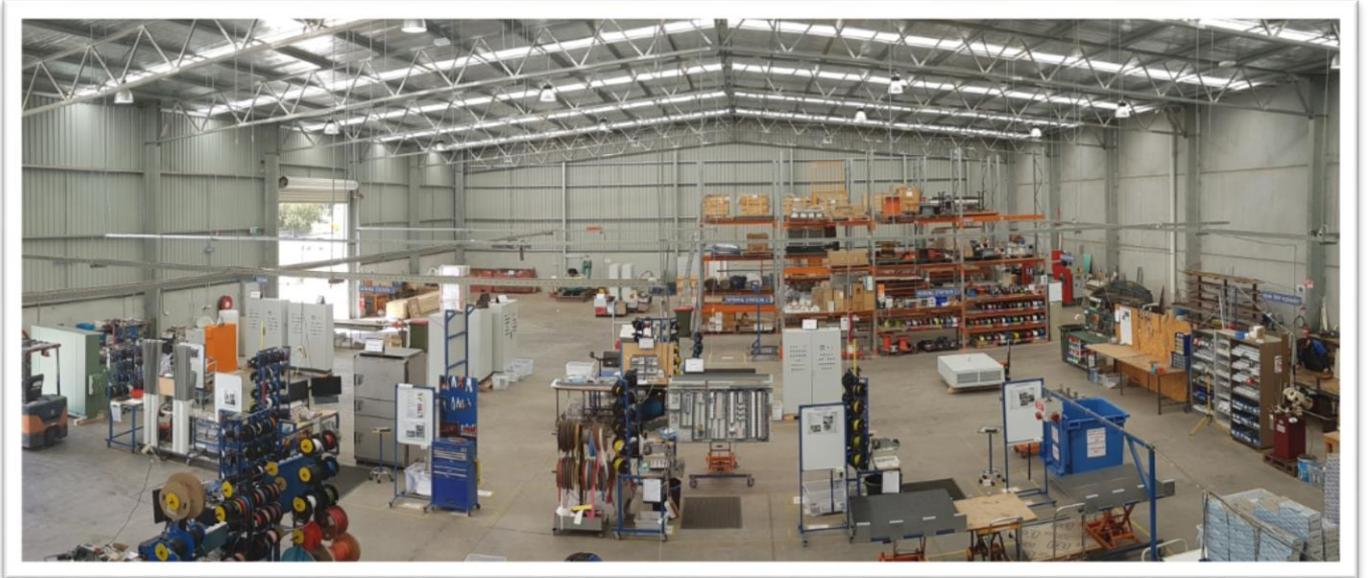

OPTION 3: Production Fitter

Join our production team without doing a formal qualification. Ideal for intelligent individuals that don't wish to pursue a qualification, or for gap year students heading to university in the next year or two.

- Awesome culture
- Awesome work environment
- Technologically advanced
- Highly structured & systemized
- Very strong commitment to ongoing training and learning
- Free morning tea every day
- Regular company BBQs

We care about YOU!

Metroid is passionate and committed to helping young apprentices and trainees fulfil their potential and advance in their career.

If you're an intelligent and technically minded individual with a passion for learning and continually improving yourself and your work environment, we may well have an opportunity for you.

HOW TO APPLY:

Email your resume to hr@metroid.net.au and note your preferred training option.

We'd love to hear from you.
